

Paranormal Research and Investigations: Doll Test

Doll received from Karen Frazier for analysis and testing on 16 May.

Experiments planned: HT/WT measurements, Beta/Gamma testing, EMF testing, Temperature testing, EEG, UV Lighting test, Full Spectrum camera testing, EVP questioning, SB7 questioning, and reading by sensitive.

Doll Facts:

Franklin Mint Heirloom FHD Victorian Porcelain Blonde Doll
Limited Edition 1992 Vintage

Seller's description: "Jen

Her name is Jennifer, called Jen. She is 8 years old from a large family. She died from measles beautiful doll host as well as spirit she will talk on hacked radio and ghost speaker."

Testing results:

Weight: 1 pound 12.1 ounces

Height: 19 inches tall

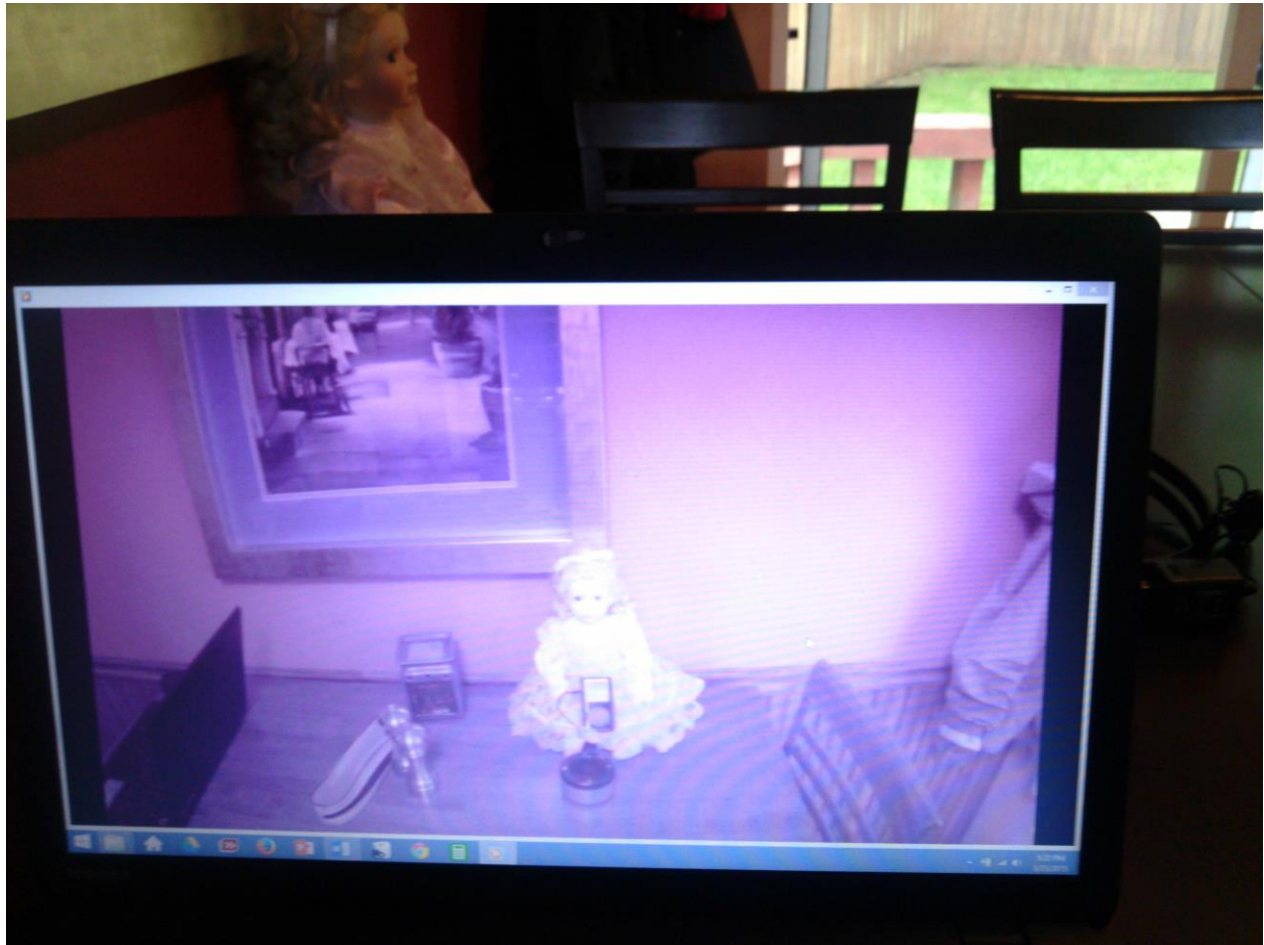

Beta/gamma 17 CPM (0.0057 conversion = 0.0969 micro-Sievert/hour ($\mu\text{Sv/hr}$) Normal range)

0.0 μg EMF

Ambient temp: 65.2°F

Doll temp: 65.1°F

No detectable brainwave activity – Note: EEG headset did not fit and may not have had complete contact.

Testing results (Cont.):

UV lighting test: No detectable anomalies

Full Spectrum camera test did not indicate anything unusual. Same as visible lighting.

EVP questioning (4 questions)

1. What is your name? **No response.**
2. Why are you with this doll? **No response.**
3. Is there anything you want or need to do? **No response.**
4. Is there anything you want to tell me? **No response.**

SB7 questioning (Same questions as above)

1. FM band fwd sweep 150ms. **No response.**
2. AM band fwd sweep 200ms. **No response.**

Impressions by Sensitive – KMJ:

1. Asian girl, 4, 5 or 6 years old.
2. Can't breathe/severe heaviness in chest.
3. Hidden/buried/suffocated.
4. Hearing "Tor" or "Tort."
5. Seeing the word "spine."

Conclusion: Insufficient evidence to prove or disprove haunting of doll.
